A FULL RANGE OF SCAN FEATURES AND CAPABILITIES IN THIS *PLACE-ANYWHERE* DESIGN

CANON IMAGE FORMULA DR-C225 II / DR-C225W II

The U-turn path minimises this scanner's footprint, freeing up important desk space for other work. Yet contained in the slim body is a high-speed, high-resolution scanner. Using the wireless equipped DR-C225W II opens up the scanning environment even more.

STYLISH AND COMPACT DESIGN PERFECTLY FITS IN YOUR WORKING ENVIRONMENT

With the use of a U-turn path, there is no need to leave a space in front of the scanner for document delivery. It hosts a highly intelligent control panel designed for ease of use. In addition, the DR-C225W II wireless model gives you even more freedom through its wireless capabilities. As well as allowing high-speed scanning of 25 ppm* in either colour or black and white, the document feed can handle many different types of documents. The new CaptureOnTouch makes easy work of day-to-day scanning tasks.

SMALL FOOTPRINT

Once a document is fed in, it follows a U-turn path and is discharged at the front section of the main unit. This eliminates the need to leave space in front for document delivery and results in outstanding space-saving. Also, switching to straight ejection path makes it possible to scan cards and other thick documents.

WI-FI CAPABILITY

The DR-C225W II comes with Wi-Fi capability, which gives you more choices of where to place the scanner. A number of compatible devices such as PCs, smartphones and tablets can share a scanner without the need of USB cables. The DR-C225W II offers a new style of scanning that utilizes the scan data across multiple devices.

Connecting via wireless access point (station mode)

This mode connects the scanner to PCs, smartphones, and tablets via a wireless access point, and allows you to share the scanner among multiple devices. Using a WPS-compatible access point makes the network configuration process that is required for using this mode quick and easy.

1-to-1 connection (AP mode)

The scanner connects to PCs, smartphones, and tablets on a 1-to-1 basis in this mode. Detection of the scanner and connections are performed from the other device, allowing you to scan images with your smart devices.

RELIABLE DOUBLE FEED DETECTION

As documents are fed in, the upper sensor transmits ultrasonic waves that are received by the lower sensor. If multiple feeding should occur, document feeding is automatically halted and a double feed is indicated, so there is no risk of data loss during scanning.

VARIOUS IMAGE PROCESSING OPTIONS

Full Auto Mode

A Full Auto Mode is available with the colour mode, page size, resolution, and text orientation automatically determined based on the contents of the document. This mode allows you to scan documents that contain pages of varying types under conditions that best suit each type. The mode also includes the Skip Blank Page Function for efficient scanning of only necessary pages.

Auto Colour Detection

This function automatically determines which documents of a mixed batch should be saved in colour, grayscale or B&W, so it's no longer necessary to separate B&W and colour documents prior to scanning.

FAST, RELIABLE AND INTUITIVE SCANNING SOFTWARE

INTUITIVE OPERATION WITH USER-FRIENDLY DESIGN

The TOP screen is laid out panel-style with large icons, allowing more intuitive operation. The items on the setup screen have also been scaled down to give a simple design. Two scanning methods are available to satisfy a variety of needs including adhoc and daily scanning. As well as "Standard Scanning" where scanning mode and output mode can be separately configured, there is "Scanning Shortcut" where the specific scanning mode and output method are preconfigured, allowing one-click operation. It's also possible to edit scanned images, eliminating the need to redo a scan if the can scan to up to three outputs concurrently.

CaptureOnTouch Mobile is scanning software for smartphones and tablets. Using this software, you can easily scan images from a wirelessly connected scanner, and then upload them to a cloud service. It's available through the App Store and Google Play, but only for the DR-C225W II.

RICH CLOUD CONNECTIVITY

Send scanned documents to a comprehensive range of cloud-enabled services, including SharePoint, Google Drive, SugarSync, OneDrive and Dropbox.

EASY-TO-OPERATE DESIGN

INTUITIVE OPERATION

Brightly-coloured levers are easily identified for more smooth and intuitive use.

HANDY FACE-UP FEEDING

When scanning, users can orient the document the right way up with the printed side facing them. This is also how it will appear on the display screen, thus making it easy to confirm the order of multiple sheets for increased scanning efficiency.
